## Withholding Formula ►(Effective Pay Period 4, 2008)◄

1. Subtract the nontaxable biweekly Thrift Savings Plan contribution from the gross biweekly wages.
2. Subtract the nontaxable biweekly Federal Health Benefits Plan payment(s) (includes flexible spending account – health care and dependent care deductions) from the amount computed in step 1.
3. Add the taxable biweekly fringe benefits (taxable life insurance, etc.) to the amount computed in step 2 to obtain the adjusted gross biweekly wages.
4. Multiply the adjusted gross biweekly wages times ►27◄ to obtain the gross annual wages.
5. Subtract a standard deduction of \$3,000 from the gross annual wages.
6. Determine the exemption allowance by applying the following guideline and subtract this amount from the result of step 5.

$$\text{Exemption Allowance} = \text{►\$930◄} \times \text{Number of Personal Exemptions}^1$$

<sup>1</sup> Number of **personal** exemptions claimed for self, spouse, and dependents. The number of **personal** exemptions is determined by subtracting the **Extra Exemptions** displayed on the Information/Research Inquiry System (IRIS), Program IR105, State Tax, from the **Number of Exemptions** displayed on IRIS Program IR105.

7. Determine the additional exemption allowance by applying the following guideline and subtract this amount from the result of step 6 to compute the taxable income.

$$\text{Additional Exemption Allowance} = \$800 \times \text{Number of Exemptions}^2$$

<sup>2</sup> Number of additional exemptions claimed for age and blindness. The number of **additional exemptions** is displayed on IRIS Program IR105 under **Extra Exemptions**.

8. Apply the taxable income computed in step 7 to the following table to determine the annual Virginia tax withholding.
